

AynsleyFire Doorsets

by Hurst Joinery Projects

Why Choose an AynsleyFire Doorset?

When safety and aesthetics are equally important, AynsleyFire Doorsets from Hurst Joinery Projects offer a balanced solution. Engineered to provide reliable fire protection, acoustic performance, and durability, our pre-hung internal fire doorsets, supplied ready to install, are designed to suit various demanding

environments, from residential developments to high-traffic commercial spaces. Tested, proven and backed by third-party certification, bespoke options, and Hurst Joinery Projects' commitment to quality, AynsleyFire doorsets deliver reliable fire protection whilst complementing various environments.

What We Provide

Each AynsleyFire Doorset is purpose-made for your project, offering:

- **Tailored Solutions:** Every doorset is manufactured specifically for each project, with extensive options for configuration, frame and edge detailing, glazing styles, and ironmongery.
- **Broad Size Range:** Tested and approved in a comprehensive range of sizes, ensuring reliable performance across various applications.
- **Solid Core Construction:** Consistent and durable solid core design, providing stability, fire resistance, and a high level of mechanical strength for demanding environments.
- **Premium Finishes:** Available in high-quality veneered, laminated, or painted finishes to complement interiors and architectural styles.
- **Third-Party Certified:** All doorsets are independently tested and certified under BM Trada's Q-Mark scheme, with UKAS-accredited third-party fire test reports or assessments provided for each door type.
- **Cold Smoke Resistance:** Options include doors with smoke seals to help prevent the passage of smoke.
- **Mechanical Performance:** Built to withstand regular use in high-traffic settings, maintaining structural integrity and reliable performance over time.
- **Acoustic and Fire Performance Combined:** Acoustic doors with fire resistance can be supplied, supporting sound control and safety in shared or noise-sensitive spaces.

- **Customised Glazing Options:** Glazed apertures can be included to allow for visibility or light without compromising on fire performance or acoustic properties.
- **Performance and Certification:** AynsleyFire Doorsets are engineered for reliable performance across sectors, with key certifications.
- **Fire Resistance:** Available in FD30s and FD60s ratings, providing fire and smoke containment for between 30 and 60 minutes.
- **Acoustic Insulation:** Reduces sound transmission, rated up to 42 RwdB for noise-sensitive spaces.
- **Durability:** Solid core doors classified for Severe Duty available.
- **Easy Identification:** Each door is equipped with identification plugs, displaying fire resistance ratings and certification details to support compliance requirements.

Core material is specified in consultation with Hurst according to size and performance required.

Finishes and Customisation

A wide selection of finishes is available, including:

- **Wood Veneers:** Natural options like American White Oak and Walnut, available in a variety of sheen level finishes.
- **High-Pressure Laminates (HPL):** Durable for high-traffic areas, with colour options and antibacterial finishes for educational settings.
- **Painted Finishes:** Factory-painted in any RAL or BS colour to blend with interior design.
- **Vision Panels:** Options include clear, frosted, or privacy glazing to allow light and visibility without compromising fire safety.
- **Ironmongery:** A wide selection of factory-fitted, compliant ironmongery available.

Client Approach

Applications and Sectors

AynsleyFire Doorsets are designed to serve diverse sectors:

Education

Acoustic doors for schools and universities.

Airports and Hospitality

Doors designed for safety and sound control.

Commercial Offices

Stylish, secure options for office spaces.

Residential and social housing

Doors designed for durability, reliability, and long-term performance.

Luxury Residential and Hotels

High-quality finishes for premium environments.

At Hurst Joinery Projects, client satisfaction is our priority. Our knowledgeable team provides project support from consultation to production and delivery, ensuring every AynsleyFire Doorset upholds the highest standards.

Our doors are third-party accredited under BM Trada's Q-Mark scheme for fire door manufacture, demonstrating our commitment to quality and compliance. Customers can trust that our products are rigorously tested and manufactured to exacting standards within a stringent certification framework.

Why Partner with Hurst Joinery Projects?
